## Three Solutions

### High Cycle

By utilizing proprietary pre-treatment equipment and the natural chemistry of the water, our patented program solves for scale, corrosion, and bacteria while saving up to 95% of water blowdown

### Hybrid

Combines a patented physical water conditioner with limited solid chemicals to solve for scale, corrosion and bacteria, providing world class results and saving up to 70% of water blowdown.

### Solid Chemistry

Utilizing a traditional chemistry approach, the solid chemistry program provides environmental benefits and additional safety for employees handling the chemicals

## Our Unique Approach

**Shift Perspective** - Shift focus from reliance on "Pump & Dump" to reliable pre-treatment of makeup water

**Natural Chemistry** - Use natural water chemistry, as opposed to hazardous chemicals

**Adaptability** - Reliable pre-treatment equipment simplifies operations, removes primary failure points, and is able to adapt to changing makeup water quality

**Real-Time Data** - 100% of our systems incorporate real-time performance monitoring and KPI tracking

**Support** - Support with high level technical service
