

# The Ultimate Solution for Clean Building Energy

UP TO 60% ENERGY COST REDUCTIONS

ELECTRICITY,

COOLING

& HEATING

from one system

## SOLAR PANELS

## ENERSION'S ENERGY CUBED

- The Energy Cubed produces electricity like solar panels, but also captures solar heat.
- The heat is converted to cooling **without electricity or synthetic refrigerants**, using Enersion's patented **nano-porous material based technology**.

**4X MORE ENERGY**  
**3X MORE CARBON SAVINGS**

NO SUN? NO  
PROBLEM!

The system continues to produce cooling and heating when there is no sun using grid electricity.

# Risk Free HVAC Integration

## RETROFIT

Enersion's cooling will act as a pre-cooler before the existing system. If Enersion does not perform, existing equipment will produce the necessary cooling.

## NEW BUILD

Enersion's system comes integrated with equipment that produces cooling and heating using electricity to cover the entire load even when there is no sun.

# Seamless AI & 5G Integration

## 15% ADDITIONAL SAVINGS

- Performance optimized by weather and user data
- Remote monitoring and control

# PAYMENT OPTIONS

Pay first and  
own the  
system

PAYBACK OF 3-6 YEARS  
(50% LESS THAN SOLAR PANELS)

Pay as you  
save

NO UPFRONT COST  
MAKE MONEY FROM DAY 1

# CURRENT INSTALLATIONS (\$1.5M+)

enersion

**30 RT Solar  
Energy Cubed**  
Institutional Building  
Calgary, Alberta

**50 RT Natural Gas  
Energy Cubed**  
Indoor Farm  
Victoria, BC

# AVAILABLE ENERGY SOLUTIONS

20% - 40% efficient

Cooling not provided - Use  
dirty refrigerant based cooling

Heat not provided - Consume  
additional gas / fuel for heating

Energy consumption not understood  
and optimized for weather

# ENERGY CUBED

**90%** efficient

Clean refrigerant free **cooling**

**Heat** from electricity generation  
consumed

Built in **AI and 5G** for optimized  
performance / monitoring
