

Power your performance with energy insights

The more you know about your energy, the better you can manage it. Our energy insights solutions offer unparalleled visibility into your entire energy infrastructure by delivering a wide range of granular and actionable energy intelligence in real-time – including electricity, gas, heat, air flow, and water. Effectively and holistically analyze your energy data, manage consumption, reduce spend, improve operational efficiency, and prevent costly downtime with our complimentary energy management platform, PowerRadar™ – and use this intelligence to make data-driven decisions that power your energy strategy forward.

4,000+

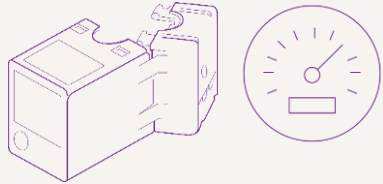

Our technology is collecting energy data for 4,000+ sites globally

18.2bn

Our technology is collecting 18.2 billion data points monthly

A simple, non-invasive process provides actionable, real-time data

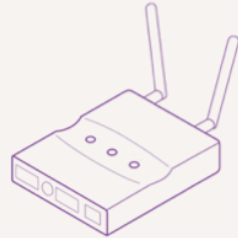

1

Data collection

Our self-powered, non-intrusive Panoramic Power™ wireless sensors – combined with your 3rd party utility meters for gas, heat, air flow, and water – collect real-time energy data and analytics from your devices and equipment at a circuit-level of granularity.

2

Data monitoring

The sensors and 3rd party utility meters continuously collect data and deliver it in real-time to our Panoramic Power Gen 4+ Bridge. The Gen 4+ Bridge then delivers the energy data via cloud technology to our complimentary energy management platform, PowerRadar, for analysis.

3

Analysis and action

PowerRadar provides a powerfully simple platform to understand, your energy infrastructure. Use the intelligence from PowerRadar – or the software of your choice – to develop an informed, data-driven energy strategy.

Why energy insights from Centrica Business Solutions?

- Visualize your entire energy infrastructure with real-time monitoring
- Manage energy consumption and reduce spend to boost efficiency and minimize waste
- Use real energy data to make informed decisions and justify investments
- Prevent equipment failure with predictive analytics and sophisticated alerts

Working with Centrica Business Solutions means

- ✓ Our non-invasive, self-powered Panoramic Power wireless sensors are easily installed on your devices and require no maintenance
- ✓ Our hardware can collect data from 3rd party meters – gas, heat, water, air – with pulse outputs
- ✓ Receive a complimentary subscription to our industry-leading energy management platform, PowerRadar, which provides you with a powerful way to understand and analyze your entire energy footprint while retaining flexibility to work with other software
- ✓ Upgrade your subscription to receive continuous platform enhancements, including integration with our energy solutions, which enable more control over your energy in a single platform
- ✓ Globally, our solution is in place on over 4,000 sites in more than 30 countries
