

Inventing and scaling technology to optimize how humanity uses energy

One common platform for electrification and sustainable operations

that brings together electric machines with optimal efficiency, edge connectivity, automation, cloud insights, and control.

Electric Machines

Turntide at a glance

- 550+ Employees
- 200+ Patents
- \$405 Million raised
- 200+ Customers
- Founded in 2013
- Offices in US, Canada, UK, and India

Driving transformational impact

Over 114 million kWh of energy saved

The same impact as planting 53 thousand acres of new forest

Backed by visionary investors

Turntide's technology helps customers

Conserve

Attack energy waste to help achieve net-zero

Profit

Operate smarter for accelerated growth

Lead

Lead in your industry and change the world

Technology for electrification and sustainable operations in buildings, agriculture, and commercial transport

Turntide for Buildings™

Transforming buildings to be connected, intelligent, and automated to help you reach net-zero emissions goals.

- + Smart Motor System™
- + Smart HVAC
- + Smart Building Operations
- + Add-On Services, Data, Integration

Technology to help you:

- + Optimize resource and energy efficiency
- + Lower costs to operate and maintain your portfolio
- + Strengthen and protect your brand

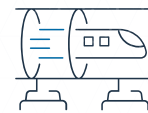

Turntide Intelligent Barn™

Optimizing animal well-being and creating more competitive, resilient dairy farms by bringing together smart equipment, connectivity, insights, and controls.

- + DairyBOS
- + VES-Artex Barn Solutions

Technology to help you:

- + Optimize costs for the entire barn
- + Maximize milk production and quality
- + Guarantee animal well-being

Turntide Electrification™

Go to market faster with a fully integrated electrification solution designed to maximize performance and safety.

- + Hyperdrive Battery System
- + Power electronics
- + Motors

Technology to help you:

- + Electrify your product without risk
- + Optimize performance with a fully integrated solution
- + Lead your industry and go to market faster

Award-winning technology with over 150+ patents

Core technologies for Turntide's electrification and sustainable operations solutions include the Turntide Smart Motors System™, an optimal, efficient motor designed to increase energy efficiency, and the Hyperdrive Battery System, a modular and flexible energy storage solution.
